

SmartSupplies RAR

Key Features and Benefits:

- Easy to use, web based tool for Online reconciliation of study drug
- Reconcile materials at the treatment kit or drug product level
- Streamlines processes, increases employee efficiency and eliminates error prone paper based processes
- Record detailed explanations for all discrepancies discovered during reconciliation
- Permits attachments of supporting documentation and diagrams throughout the system
- Replaces IVRS reconciliation, provides a common unified process for all studies
- Maintains study blinding throughout the entire process
- Combines shipment, return, and reconciliation histories
- Automatically generates return requests and documentation
- Generates email notifications to support the workflow of key process steps
- Ensures 21 CFR Part 11 compliance with full audit trail and reporting
- Allows for multiple approvals with electronic signature capabilities
- Provides group, user and program, trial, site, level security
- Supports LDAP authentication

SmartSupplies

Reconciliation, Accountability, and Returns

SmartSupplies RAR (Reconciliation, Accountability and Returns) is an easy to use, fully web based software solution that will accelerate and streamline the global clinical reconciliation and accountability process in a manner that is compliant with industry standards and regulations.

Performing reconciliation has never been easier. SmartSupplies RAR was designed by clinical teams to be used during the monitoring of a clinical site. SmartSupplies RAR lists the materials that need to be reconciled and provides an intuitive graphical user interface to rapidly complete the activities.

SmartSupplies RAR replaces costly and difficult to use IVRS based reconciliation methods, providing an intuitive, unified global approach to the Reconciliation, Accountability and Returns process.

Study Configurations

SmartSupplies RAR can be configured independently for every study. This allows each study to have its own unique set of business rules, data validations and process control. The configuration is easily performed by an authorized user and does not require custom software coding or programming of any kind.

Integration Options

SmartSupplies RAR can be purchased as a stand-alone product or as a fully integrated SmartSupplies product. When combined, the SmartSupplies suite provides unmatched capabilities for end-to-end investigational supply chain management.
